**Skin:** Remove contaminated clothing and wash affected areas thoroughly with soap and water.

**Inhalation:** Move person to fresh air and keep at rest until recovered.

**ADVICE TO DOCTOR**

No specific antidote is available. If poisoning is suspected apply symptomatic therapy.

**5. FIRE-FIGHTING MEASURES**

This product is non-flammable and non-explosive. Extinguish warehouse and factory fires using fine water spray or foam. Do not allow fire-water to enter drains.

**6. ACCIDENTAL RELEASE MEASURES**

**Accidental Release:**

In case of spillage it is important to take all steps necessary to:

- Avoid contamination of all areas where vegetation grows - this is an extremely potent selective herbicide, and contaminated areas may not support vegetation for many years.
- Avoid eye and skin contact.
- Avoid contamination of waterways.

**Procedure for spill:**

- (1) Keep all bystanders away.
- (2) Wear full length clothing and PVC gloves.
- (3) Sweep up dust thoroughly and shovel into an uncontaminated drum, adding any broken containers.
- (4) If agricultural soil has been contaminated consider the option of removing and disposing of the contaminated soil to allow vegetation to grow and to stop further contamination.

- (5) Dispose of by burying in an approved secure landfill site.  
(6) Clean all contaminated equipment by rinsing in a dilute solution of 1 litre sodium hypochlorite (0.2%) solution, to 200 litres of water.

**Note:** *In the unlikely event of a major prepared spray spill, consider the possible long term consequences to the vegetation. If good agricultural land is likely to be affected it may be necessary to contain and absorb the spill with a soil or sand dam. Disposal of sand/soil dam and any contaminated soil should be carried out as above.*
